1.0. Introduction

The ACR122T is the token version of the ACR122U, the world’s first NFC card reader compliant with the CCID standard. It is developed based on the 13.56 MHz RFID technology and the ISO/IEC 18092 NFC standard. It supports not only MIFARE® and ISO 14443 Type A and B cards but also FeliCa and NFC tags.

Because of its compact size and great portability, you can bring the ACR122T and conveniently use it in public areas such as a coffee shop or use it at home to securely log in to your notebook, load your e-Purse, check your balance, and pay for a product or service you ordered.
